## PROFESSIONAL SUMMARY

React Developer with ~2 years of experience building scalable, config-driven frontend applications using React.js, TypeScript, and modern JavaScript (ES6+). Specialized in developing reusable component architectures, dynamic form systems, and complex conditional workflows. Experienced in integrating REST APIs, optimizing performance using React hooks and code-splitting techniques, and designing extensible frontend systems used across multiple product modules. Strong ability to translate Figma designs into responsive, production-ready interfaces and debug complex UI issues in large-scale applications.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), TypeScript

**Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

**React Ecosystem:** React Hooks, React Query, React Hook Form, Zod, Component Architecture, Performance Optimization

**API & Data Handling:** REST APIs, Axios, API Integration, Dynamic Data Rendering, Caching

**Architecture & Patterns:** Config-Driven UI, Reusable Component Design, Overridable Architecture

**Tools & Version Control:** Git, GitHub

**UI/UX Tools:** Figma, Canva

**Operating Systems:** Linux, Windows

## EXPERIENCE

**Nvest Solution II Thane, Maharastra**

*Jun 2025– Present*

Junior Software Developer

- Built and maintained a reusable React component library used across multiple product modules, reducing UI duplication and improving development speed.
- Optimized component rendering using React.memo, useMemo, and useCallback, reducing unnecessary re-renders and improving UI performance.
- Integrated REST APIs using Axios, handling loading states, error handling, and dynamic data mapping.
- Implemented lazy loading and code splitting to improve application performance and reduce bundle size.
- Collaborated with designers and backend developers to convert Figma designs into responsive, production-ready interfaces.

**Techloom Solutions II Bhopal, Madhya Pradesh**

*Jun 2024 – Jun 2025*

Front End developer

- Developed client-facing web applications using React.js, JavaScript (ES6+), HTML, and CSS.
- Created modular and reusable UI components following component-driven architecture.
- Integrated backend APIs and handled dynamic data rendering inside React components.
- Built responsive layouts supporting desktop, tablet, and mobile devices.

## PROJECTS

**InsuranceCoreApp – Enterprise Insurance Platform**

- Architected a multi-module insurance platform (Config, Banking, Product, Reinsurance, KnowledgeBot) with 50+ reusable UI components, dynamic theming, i18n, and role-based access control – published as an overridable NPM package consumed by multiple client apps.
- Built 30+ configuration pages with complex CRUD workflows, draggable data grids, and multi-step forms using React Hook Form + Zod validation, integrated with REST APIs via React Query with caching and optimistic updates.
- Designed the core/client architecture using an overridable() pattern, enabling client apps to extend or replace any component/config without forking – serving Motor, Health (GHI/GTL), and Reinsurance product lines from a single codebase.

**FALBROKER – Car Insurance Web Platform (Dubai)**

- Developed and maintained a car insurance web application for a Dubai-based client.
- Built multi-step insurance journeys with dynamic forms, validations, and conditional UI logic.
- Created reusable and configurable React components to support different insurance scenarios.
- Integrated REST APIs for quotes, policy details, and user actions with proper loading and error handling.

**Fitness exercise Application** React.js, Tailwind CSS, UI/UX

- Built a fitness application displaying 1000+ exercises using React and REST APIs.
- Implemented dynamic search, filtering, and category-based browsing.
- Optimized API data handling and image loading for smoother UI performance.

## EDUCATION

**Barkatullah University Institute of Technology [BUIIT] Nov 2020 – Jun 2024**

Bachelor of Technology in Information Technology Bhopal, Madhya Pradesh
